Thx John:

Its good to realize that we probably have a clean monitoring well and final plume delineation in an upgradient direction in the Mid-Valley.

regards.

Hi Joe,  
To date, 171MW-12 sampling has been conducted at 180-200, 160-180, and 140-160 ft bgs. Color-tec results were non-detect for the three samples. The lab results were also non-detect for TCE. Low levels of toluene (estimated, <1 \*g/L) were reported by the lab in all 3 samples.

We'll be completing the sampling at 171MW-12 this afternoon and tomorrow.

John

Subject: 171MW-12

Hi John:

Did the upper intervals (160-140,140-120...etc.) for 171MW-12 indicate any TCE with the color tec?
