Subject: Area D, April 6, 2010, Not Acceptable.

Ted,

We have just received and reviewed the Area D Report, dated April 6, 2010. It is not acceptable. See NJAC 7:26E-6.3(e).

A Mann-Whitney, or equivalent, test must be run on the MNA data.

Kindly apply the statistical Mann-Whitney U-Test, or equivalent, to eight consecutive quarters of ground water sampling data. The test shall be applied to individual contaminants detected in each area of concern monitoring well.

regards.
