Ted, Figure 11 in the Group 1 Sites ROD shows 10 areas of attainment (AAs) in surface soil and subsurface soil to be excavated and disposed off-site. However, the Remedial Action Work Plan for the Group 1 Sites shows only 3 AAs based on more recent sampling in surface soil to be excavated and disposed off-site. Accordingly, EPA requests that Figure 11 from the Group 1 Sites ROD be revised to reflect that only 3 AAs, AA 1 SS-1, AA 1 SS-7, and AA 2 SS-1, will be excavated and disposed off-site. I did not see any, but if there is any text in the ROD that refers to the 10 AAs, that should be revised as well and forwarded to this office so that we may replace the the affected pages and figure. Thanks, Bill
