| 1.              | General                 | A second injection well at the northern plume, adjacent to 2IW-11 is recommended. | <p><i>Agreed. A second injection well has been added to the northern plume. The first sentence of the last paragraph within Section 3.4.1 now reads:</i></p> <p><i>“The North Plume IRZ will consist of two injection wells 2IW-11 and 2IW-12, located 10 ft generally upgradient of monitoring well 2MW-14 (Figure 7B).”</i></p> |
