Site 34 (PIC

Classification: UNCLASSIFIED

Caveats: NONE

All:

As has been discussed at our technical meetings and within the IAG schedule, attached is a report on the recent sampling of the wells around site 34/PICA 02/the burning grounds. The sampling included the additional well that was proposed in the Site 34 Record of Decision. The results are to be used for the remedial design ARCADIS will be implementing once the burning operations stop at the site.

We do not consider this a high priority review for you. Only Greg will be getting a CD of the EDDs.
